Data Center
Solutions

The world's best power measuring and monitoring products and solutions. Designed and engineered specifically for data centers and the telecommunications industry.

Server technology releases Sentry Power Manager Management Pack for Microsoft System Center Operations Manager 2007

The all-in-one data center power solution:
Sentry Power Manager v5.0.

The comprehensive integration of SPM, our data center power measurement and monitoring solution with System Center Operations Manager 2007, gives data center professionals a comprehensive dashboard view to manage their networked cabinet power distribution units (CDUs), including all alerts, alarms and power and environmental information. It's an incredibly effective and scalable solution for data center power monitoring and capacity planning needs.

Synergy® - the new Control Room Console

The modern Knürr Synergy® control room concept actively contributes to increased efficiency. Less fatigue, less back complaints and full employee concentration are the requirements for effective working in safety-relevant areas. The well-balanced contouring of the new Knürr Synergy Console® offers ideal dimensions for monitor workstations and supports the cockpit arrangement of flat screens. The basic console is already manually height-selectable. The control room is consequently equipped for the future. Standards compliance and ergonomics. The fully compliant ergonomic leg space enables free movement of the chair in the link-up area. Spacious 1,000 mm desk depth for placing large monitors. Compliance with the latest standards and specifications. Manually height-selectable, even in the basic version.

We provide specialized product solutions for

Control Room Workstations

Sit-/Stand Workstations

Electronic Workstations

Mobile Equipment Carriers

Trader desk

19" rack system

Monitor Wall

Accessories
