

Dafnia Newsletter

September 2011

Dear Valued Customer,
Please find our newsletter for the month of September.
We bring you information on the products / services we offer.

The **Sticklers™** fiber optic cleaning products manufactured in USA, are the only fiber optic cleaners on the market today that have been engineered as a total system to deliver "wet-dry" cleaning. Wet-dry cleaning is the industry's recommended best practice, and the Sticklers™ products have been designed from the ground up to work as a cleaning system -- all the different pieces working together and enhancing each other's performance, to deliver the cleanest network at the absolute lowest possible cost.

Sticklers™ Cleaning kit

Each kit includes two cans of the cleaning fluid, 50 CleanStixx™ swabs (30 S25 CleanStixx™ and 20 S12 CleanStixx™), one mini-tub of CleanWipes™ 90, one box of CleanWipes™ 400, 25 CleanWipes™ Singles for Harsh Environments, and a high-brilliance LED inspection flashlight.

The above mentioned contents can also be purchased separately.

Fibre Optic Installers Kit

A comprehensive toolkit for the fibre optic installer covering all the essential tooling required in a smart Eurocase with pre-formed base tray and toolboards.

Fibre Optic Installers kit comprises:

Laser goggles, Eurocase standard, compartment parts box, Plastic parts box, Combination pliers 160mm (6 inch), 150mm side cutters, 3m/10ft tapem measure, Quick change retractable knife, Junior hacksaw stripper, Cable ringing tool, Fibre stripper 10A, Slotted screwdriver 75 x 3.2mm, Kevlar scissors, Disposable bin Pozi screwdriver 60mm x No. 0, Pozi screwdriver 75mm x No. 1, Screwdriver 100 x 6mm, 125mm straight tweezers, Lint free wipes, Clean Core cassette, 4oz IPA dispenser

Quick Cure Fibre Termination Kit

The new Fusion Quick Cure Fibre Termination Kit, specifically designed for quick on site terminations or where power is not available.

The Quick Cure Adhesive and Activator work with all standard ST and SC Connectors (not supplied) making the product highly cost-effective and usable on all site locations.

The kit is supplied with x 200 magnification microscope in a standard Fusion ABS Eurocase C/W foam insert with tool-board, and easy to understand instructions, and many more products.

Fibre Microscope

Handheld and lightweight microscope available in 200X and 400X magnifications. Light passes through the objective lens and adapter tip, striking the ferrule perpendicular to the end face, producing a high level of resolution and excellent detail of scratches and contamination.
